Re: Connecticut Organics, LLC
18 Mullen Road

Dear Georgienna,

On behalf of Connecticut Organics, LLC, I do hereby withdraw the pending Inland Wetland Permit application (IWC #661) for regulated activities at 18 and 36 Mullen Road. As you are aware, the previously proposed wetland crossing to provide an internal connection between the two properties has been eliminated from the proposed plans. As a result, no activity is now proposed at 36 Mullen Road.

Attached to this letter is a new application for a wetland permit for the remaining regulated activities associated with the expansion of the outdoor storage at 18 Mullen Road. The proposed project will now be limited to the creation of an approximate 3.3 acre outdoor storage area in the field on the western side of the wetland that runs along the common property line of 18 and 36 Mullen Road. A swale is proposed on the downgradient side of the storage area to collect runoff and convey it to a new stormwater management basin located at the southeastern corner of the site. The stormwater basin has been designed in accordance with the CT Water Quality Guidelines to provide treatment and detention prior to discharge to the edge of the existing wetland at the site. A 50' wide planting strip is also proposed along the frontage of 18 Mullen Road to enhance the wetlands in this area. The revised project does no longer involves any direct wetland disturbance. Overall, the project will involve approximately 1.41 acres of work within the upland review area. The overall wetland enhancement area is approximately 14,510 square feet.

If there are any questions, or you require further information, please call me at (860) 623-0569.

Very truly yours,

Timothy A. Coon, P.E.
J.R. Russo & Associates, LLC
